VOLUNTARY SAFETY PRODUCT INFORMATION DATASHEET

Dear Customer,

under the REACH Regulation the status and importance of the safety data sheet has changed. Safety data sheets are documents with a legally defined scope which have to fulfill certain requirements related to the format and content (Annex II of the REACH Regulation). Following the REACH Regulation the communication of important information via Safety Data Sheets (SDS) is only foreseen for substances and mixtures. Our products are therefore excluded from the obligation of to provide a 'Safety Data Sheet' (SDS) (REACH Regulation - Article 31).

This document has the same general format of a MSDS (16 paragraphs). However, some subparagraphs are not filled in because they are not relevant because of the status of articles of our products. Please, consider that the provision of this document is a voluntary service as there is no obligation to provide this document, and that this datasheet is for information purposes only.
